

K-Love is a very vital part of our local community. They provide a family-oriented, safe place for kids and adults who are tired of listening to the garbage that is going over the airways these days. Having K-Love displaced by an LPFM broadcaster would have a devastating affect on our local community and the thousands of listeners that support this radio station. There has been an attack on people who want clean, family-oriented entertainment for their children and themselves. I hope that you will reconsider and not allow LPFM stations to have priority over current FM translator services. Thank you for you help in allowing me to have a safe place to enjoy listening to the radio.
